AMUNEAL QUICK SHIP
SUMMER + FALL 2023

# COLLECTOR'S SHELVING UNITS

amuneal

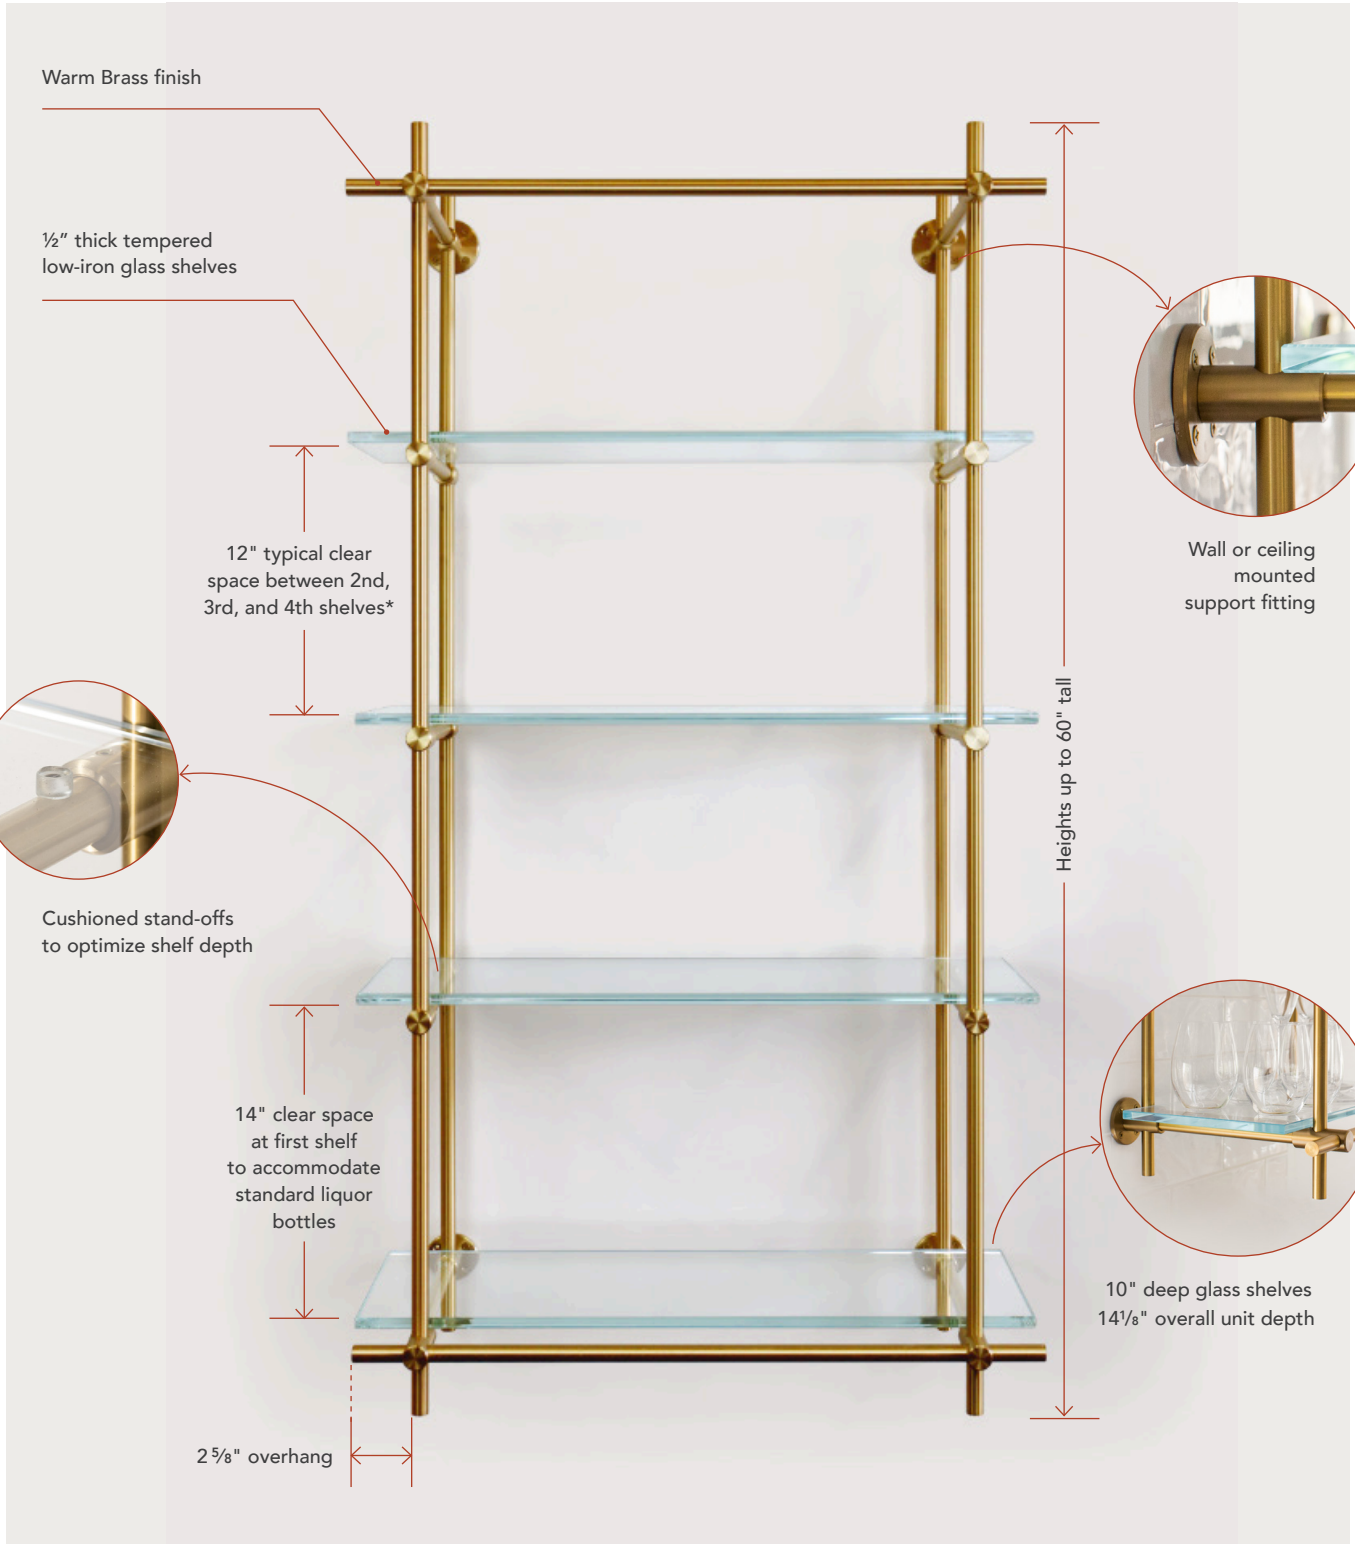
*Pair of **Ceiling Mounted + Wall Supported** units | **2 shelves** | **30" wide** | 34" tall | **$3,630** ea. | shown 18" above the bar counter*

# 48 possible options...ready to ship in 4 weeks or less!

Our Collector's Shelving Units have been featured in award-winning residential, hotel, retail, and hospitality projects. Each year we produce hundreds of bespoke units, engineered and fabricated to our customer's specifications. This new program offers a pre-engineered, curated selection of our most requested wall and ceiling mounted units. Each unit is finished by hand, built to order, and offered in our most popular options.

And not to worry—if you don't find what you are looking for, our team is here to help you design the perfect custom unit for your project.

# The details matter...



*Spacing of top shelf will depend on the specified overall unit height

***Wall Mounted** unit | **4 shelves** | **24" wide** | 60" tall | | **$4,403***

# Choose your width, count your shelves...find your price.*

(All units can be up to 60" tall for the same cost.)

| | 24" WIDE | 30" WIDE | 40" WIDE | 48" WIDE |
|---|---|---|---|---|
| 1 SHELF |  $3,090 | $3,193 |  $3,399 |  $3,502 |
| 2 SHELVES |  $3,528 |  $3,631 |  $3,837 |  $3,940 |
| 3 SHELVES |  $3,966 |  $4,069 |  $4,275 |  $4,378 |
| 4 SHELVES |  $4,403 |  $4,506 |  $4,712 |  $4,815 |

*The fine print... 1. Costs do not include installation, freight, or sales tax. 2. Assume 10% additional for domestic shipments. Actual freight costs and applicable sales tax will be calculated at the time of order. 3. Installation is available at an additional charge in certain cities.

*Pair of **Wall Mounted** units | **3 shelves** | **30" wide** | 47" tall | **$4,068** ea. | shown 18" above kitchen counter*

# Installation considerations

These units are designed to look light, but don't be fooled—they can get pretty heavy!

***Ceiling Mounted** unit | **2 shelves** | **40" wide** | 36" tall | **$3,836** | shown 30" above kitchen counter*

Our Collector's Shelving Units should always be installed by a professional, using best construction practices. We highly recommend that proper blocking be installed behind each mounting flange. For blocking, we recommend a minimum of ¾" thick plywood at walls, and 1½" thick plywood at ceilings.

For installations that cannot have blocking installed, our units can be installed using properly rated ceiling or wall anchors, but a bit more time should be allocated to these installations. Please consult our installation guidelines for installation details and site considerations.

# Payment + shipping

When placing an order for your Quick Ship unit, it is important to note the following:

- Costs do not include installation, unless specifically quoted on your invoice.
- Only the final invoice will contain freight costs and applicable sales tax.
- Amuneal is not responsible for inadequate site conditions, such as insufficient blocking, or inaccurate field measurements.
- Verifying that the conditions of your site are suitable for the unit you have selected, and that the unit is appropriately sized for your space, is crucial.

### NEXT STEPS

Once you have completed the order form + checklist, please email it to orders@amuneal.com. Our Sales and Design team will review the information provided and reply back with an invoice for your order that contains the cost for your units, the confirmed freight costs, and any applicable sales tax. In addition, our team will address any technical questions about the sizing and site information provided, to ensure a successful installation.

Payments for orders can be made via wire, check, or credit card. Once payments are received, we will confirm your order and ship date, and your unit will begin in fabrication.

### INSTALLATION GUIDELINE

Once your order is in production, we will send you a copy of our installation guidelines and a copy of a typical technical drawing for your unit. (Please note that our Quick Ship units are standard, except for height; as a result, these drawings may not be to scale.)

### ESTIMATED FREIGHT

All of our unit pricing includes costs for packaging but does not include transportation costs. Each of our units ships from our fabrication facility in Philadelphia, PA and are designed to be able to be delivered via common carrier. Domestic freight is typically an additional 10% of the unit cost. International freight varies more broadly based on destination and speed. All duties and taxes are not included in these approximations and will be calculated by our team at the time of order.

# FAQ

**Finish:** Our Quick Ship units are only available in our hand patinated "Warm Brass" finish.

**Dimensions:** Each of our Quick Ship units are available in their fixed overall width, shelf depths, and shelf spacing. However, each unit can be custom sized in heights up to 60" (in full inch increments).

**Available options + customization:** As we launch this program, we have restricted the available options that we can offer. Stay tuned for additional offerings, but in the meantime, for units with lighting, millwork, or custom sizing please contact our Sales + Design Team and we will be happy to quote the custom units for your project.

**Can I supply my own shelves?** Yes! Simply indicate the number of shelves you will be providing, and we will ensure that our shelf supports are mounted as required.

**What is blocking + how do I know if I have it?** We use the term "blocking" to refer to wood supports that have been fastened within your wall or ceiling framing members, for the purpose of providing attachment support for our shelving. Blocking can take many different forms, but we recommend at least ¾" plywood blocking to support wall mounted units and 1½" blocking to support ceiling hung units. As a rule of thumb, if you didn't specifically ask for blocking to be installed by your contractor, you should assume that you don't have it.

**Is my unit too tall?** When specifying the height of your unit, it is important to consider the clearance that you want to maintain between the bottom of your unit and the surface below. The following are our suggested guidelines for typical clearances between our units and the surfaces below:

| | |
|---|---|
| Kitchen Counter: 18–24" | Kitchen Island: 24–30" |
| Kitchen Sink: 24–30" | Bathroom Vanity: 18" |
| Bar Counter: 18" | Desk: 24" |
| Bar Sink: 24" | Console Table: 18–24" |

# FAQ (continued)

**How useful is my top shelf?** When deciding the overall height and quantity of shelves, it is important to understand how much room you will have above your top shelf and how usable that will be. The following table shows our recommended minimum heights for typical installations, based on the number of shelves selected and the location of the horizontal support bar.

| # of shelves | Minimum height for ceiling mounted | Minimum height for wall mounted |
|---|---|---|
| 1 | 18" | 22" |
| 2 | 31" | 34" |
| 3 | 43" | 47" |
| 4 | 56" | 59" |

**Quantity discounts:** To make this program accessible, the production quantities have already been considered in our pricing. Additional discounts are available for orders with more than 4 units of the same size.

**Shipments:** Each of our units are packaged and can ship via common carrier. For taller units (with 3 or more glass shelves), two boxes may be required. All shipping details and costs will be supplied by our team prior to payment.

**International shipments:** We use a freight forwarder to ship these units outside of the US. Once we have received the final destination of the package, we can supply you with cost options based on different transit times to your location. Please note that these costs do not include local duties + taxes.

**In-person viewing:** If you or your clients are interested in seeing the quality of our units in person, we invite you to visit our showroom in NYC.

**Care + maintenance:** Once installed, the only care required for these units is routine cleaning. All the metal components are sealed and protected with a lacquer finish. However, since this finish is susceptible to degradation when exposed to ammonia-based cleaners, it is important to avoid applying glass cleaners directly to the metal. When cleaning your glass shelves, we recommend that the cleaner be applied to a clean cloth and then used to wipe your shelves. For cleaning the metal elements of the shelving units, we suggest a damp, lint-free or microfiber cloth. In the case of a spill or to remove other surface stains, a mild soap solution can be used for cleaning the metal components.

***Ceiling Mounted** unit | **2 shelves** | **40" wide** | 40" tall | **$3,836** | shown 48" above kitchen island*

**Installation:** Installation of these units should only be performed by professionals. We are happy to answer any technical questions you or your contractor may have to ensure a successful and beautiful installation.

**Installations by Amuneal:** Some locations are easier to support than others, but we are happy to provide pricing options for our installers to perform your installation.

**Still have questions?** We are here to help! Members of our Sales + Design Team are happy to walk you through the details of our products and help you make the best selections for your project.

# Order form

Please complete an order form for each different unit.

**Unit selected**

- ☐ 24" wide
- ☐ 30" wide
- ☐ 40" wide
- ☐ 48" wide

**Number of shelves**

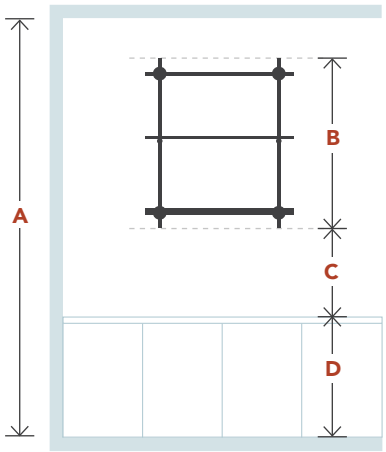
- ☐ 1 shelf
- ☐ 2 shelves
- ☐ 3 shelves
- ☐ 4 shelves

**Quantity of identical units:**_____

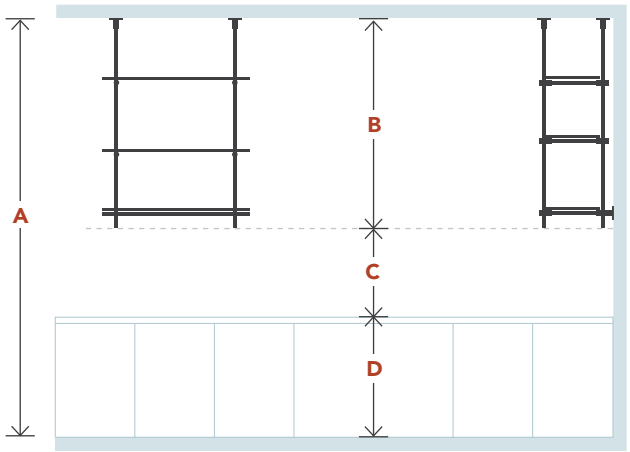
☐ **Check here if you plan to source your own shelves**

**MOUNTING STYLES**

☐ WALL MOUNTED



☐ CEILING MOUNTED



☐ CEILING MOUNTED + WALL SUPPORTED

**DIMENSIONS**

**Ceiling height (A):** _____"

**Unit height (up to 60" high) (B):** _____"

(whole inch increments only)

**Minimum height between unit and top of surface below (C):** _____"

**Height of counter or surface below unit (D):** _____"

**MOUNTING DETAILS** (check all that apply)

**Unit will hang above**

- ☐ Kitchen counter
- ☐ Kitchen island
- ☐ Sink
- ☐ Bar counter
- ☐ Other: _____

**If ceiling mounted** (check all that apply)

- ☐ You have crown molding
- ☐ Your ceiling is angled
- ☐ Your unit is in front of a window

**Blocking + mounting confirmation**

- ☐ You have blocking in your walls (for wall mounted or ceiling mounted and wall supported units)
- ☐ You have blocking in your ceiling (for any ceiling mounted units)
- ☐ You plan to add proper blocking (for your wall or ceiling mounted units)
- ☐ You do not have blocking and do not plan to add any

**If mounting to stone, tile, glass, or brick**

- ☐ The material surface is smooth / polished
- ☐ The material surface is textured / rough

# Order form

**Are you a/an:** ☐ Architect / Designer ☐ Homeowner ☐ Contractor

**This project is:** ☐ Residential ☐ Commercial
